

The Town of Carroll has plans to enhance and to beautify the Marden E. Cobb Waterway Trail which is located on Falconer Street in Frewsburg near the Conewango Creek overpass.

Due to the ever increasing popularity of fishing, canoeing and kayaking in our area, it was determined that the Town would expand the parking capabilities of the Marden E. Cobb Waterway Trail to accommodate the access to the Conewango Creek for recreation and tourism within our community.

During the time of the anticipated construction and improvements, we ask that the users of this boat launching area, be patient while our Town Highway & Water Department crews institute these much needed improvements to make it more user friendly. We also have plans to enhance the boat launching needs of our area and the construction of a new boat launching ramp is underway.

Thank you to those individuals who utilize this valuable resource and enjoy what our community has to offer.
